Professional Summary

Strategic Lead Product Designer with 15+ years of experience delivering digital products and customer experiences across insurance and retail. Strong background in UX/UI, design systems, information architecture, user research, experimentation, and end-to-end product design across web, mobile, and service journeys.

Experienced in simplifying complex problems into scalable, intuitive digital experiences that improve engagement, conversion, sales, and operational efficiency. Brings a commercially aware, customer-centred approach to product delivery, with a strong track record of partnering with Product, Engineering, Analytics, and business stakeholders to create alignment, improve delivery quality, and lift design capability over time.

Core Qualifications

- › **Design systems, reusable patterns, scalable UX/UI practices, and multi-brand experience.**
- › **End-to-end digital product design across web, mobile, and service journeys.**
- › **Product strategy, customer experience strategy, and journey-led design thinking.**
- › **Information architecture, wireframing, prototyping, and interaction design.**
- › **Human-centred design, qualitative and quantitative research, and usability testing.**
- › **Accessibility-aware design and intuitive experience design for complex journeys.**
- › **Experimentation, A/B testing, analytics, KPI tracking, and optimisation.**
- › **Workshop facilitation, stakeholder engagement, and cross-functional collaboration.**
- › **Agile delivery, design leadership, and strategic communication.**
- › **Emerging technology, AI-enabled experiences, and data-informed design decisions.**

Professional Experience

Lead Product Designer // Zurich Cover-More // 2022–PRESENT

- ▶ Lead UX/UI design across digital products and complex insurance journeys, translating business, customer, and technical requirements into clear flows, prototypes, and production-ready experiences.
- ▶ Defined UX/UI direction for end-to-end product experiences, partnering closely with Product and Engineering from discovery through delivery to accelerate time to market.
- ▶ Spearheaded design for a native leisure mobile app, contributing to a 22% increase in engagement through an AI-powered itinerary planner for travellers.
- ▶ Improved customer outcomes and validated design decisions through qualitative research, analytics, and KPI tracking, contributing to a 16% uplift in cross-platform conversions.
- ▶ Developed a journey-led product design framework supporting reusable patterns, feature configuration by brand, measurement, incremental migration, and design governance.
- ▶ Contributed to the consolidation of Freely and Cover-More mobile experiences onto a shared React Native technology stack while preserving distinct brand expression and scalable experience patterns.
- ▶ Partnered with Product, Engineering, Analytics, Brand, and other stakeholders to identify scalable opportunities across customer journeys, platform capabilities, and design systems.
- ▶ Secured executive buy-in for innovative digital solutions through workshops, strategic storytelling, user flows, sketches, and prototypes.

Lead Product Designer // PML // 2011–2022

- ▶ Directed end-to-end website redesigns across multiple brands and business units, lifting online sales by 32% through journey mapping and information architecture optimisation.
- ▶ Established an insight-to-action research practice, reducing bounce rates by 24% through contextual inquiry, card sorting, and usability testing.
- ▶ Embedded A/B testing and experimentation into the design process, increasing conversion rates by 21% through more evidence-based design decisions.
- ▶ Aligned digital design strategies with business and marketing objectives, achieving a 93% on-time delivery rate through scalable design approaches, adaptable systems, and audience-aware content design.

Digital Manager // PACIFIC BRANDS // 2007–2011

- ▶ Enhanced user experiences across major consumer web properties and in-store digital touchpoints, increasing retail digital engagement by 26% through a customer-led design approach.
- ▶ Accelerated user acquisition by 17% across multiple online channels through behavioural analysis, journey optimisation, and quantitative experimentation.
- ▶ Supported a scalable CMS migration and improved interaction design production, decreasing platform downtime by 14% through detailed IA deliverables including sitemaps and page flows.

Education

RMIT // 2025

CX Strategy and Design

CHARLES STURT UNIVERSITY // 2011-2014

Master of Information Studies (Information Architecture)

NIELSEN NORMAN GROUP

Visual Design Principles for UX, Mobile User Experience, Wireframing and Prototyping, Agile Development and User Experience, Information Architecture, Persuasive Design

DESIGN CENTRE ENMORE

Diploma in Design
